

Nikko Stirling

OPTICS FOR SPORT, SINCE 1956

WWW.NIKKOSTIRLING.COM

Welcome to Nikko Stirling Optics for sport, since 1956.

In 1956 Malcolm Fuller started to create Japanese made high-precision optics perfectly suited for the Australian hunter and sports shooter.

Since then millions of successful users have become loyal customers.
World Titles and numerous awards have been won with
Nikko Stirling products.

State-of-art optical designs, high-grade lenses, high-performance coatings
and some of the industries tightest tolerances and quality assurance
processes are the basis for this achievement.

This legacy is carried on from generation to generation across the world.

Thank you for being part of our success story over several
family generations.

Please enjoy browsing through our new catalogue.

ULTIMAX

30MM

2.5-10x50
UL21050

The Ultimax series is developed for hunters which are looking for the top end at reasonable costs. This 30mm scope series is developed and made in Japan. Best glass, optimised coatings and optical calculations combined with production to the tightest of tolerances in our industry delivers a premium product with a crisp clear image.

FEATURES

- Made in Japan
- 4A illuminated reticles
- 30mm maintubes
- Precise small centre dot for accurate shooting
- $\frac{1}{4}$ MOA (7mm@100m) clicks
- Fiber illumination technology for brightest and crisp dot
- Matte black finishing

Precise small fiber illuminated centre dots supports accurate shooting. The outstanding field of view (FOV) of 40m@100m on the driven hunt model allows quick and save shots on close distances. All features 30mm maintubes and bell diameters up to 56mm covers the need for hunts in bad light conditions or during night.

FIBER OPTIC ILLUMINATION SYSTEM

This new technology is an important improvement of the common illumination systems, used for all Ultimax scopes. It offers an extremely bright and precisely illuminated sharp red dot at the same time. Even in brightest conditions such as snow, sun or sand, your Ultimax scope supports your hunt with a perfect illuminated precise red dot. Of course lowest settings of this illumination are optimised and field tested for lowest light conditions. This helps your shooting and is a major difference to common illuminated reticles.

C-MORE X10

30MM

2-20x44
NSCM22044

Along with many other great features these new scopes guarantee to offer great consistent image viewing quality across the entire visual field throughout the whole 10x zoom range of the scope.

FEATURES

- CNC machined parts made to tightest tolerances
- Aircraft approved aluminium
- High Grade Optical lens coatings for maximum light transmission
- Low profile adjustments
- Finger adjustable dials
- Rugged Knurling
- Speed focused eyepiece
- 10x zoom range

The unique X10 Series was designed by C-More Systems located in Virginia/US. These new scopes feature a true 10x zoom range, fully multi-coated low dispersion ETE lenses and the new Half Mil Dot (HMD) glass etched reticle.

DIAMOND

30MM HUNTING

2.5-10x50

NDSI251050

The quest for the trophy or the exclusive game animal takes today's hunters to more extreme locations where the climate and terrain pushes the hunters and their equipment to the limit.

FEATURES

- CNC machined parts made to tightest tolerances
- Aircraft approved aluminium
- Speed focused eyepiece
- Low profile adjustments
- Fast finger adjustable dials
- High Grade Optical lens coatings for maximum light transmission
- Rubber enhanced zoom ring
- Dual colour red/green illumination
- Illuminated colour glass etched No. 4 reticles

Faster shooting in low light – the Diamond 30mm Illuminated reticle models are designed for fast shooting in low light conditions. Here the hunter needs to quickly take a shot at game in dawn, twilight or forest conditions. The clearly defined red or green illuminated reticle makes this easy. Ideal for driven game hunting!

ETE Microlux optical coatings are added to the lenses to reduce the reflection of light by the lens surfaces, ensuring a brighter scope in low light conditions when target acquisition is critical.

Available in 30mm illuminated versions with objective diameters starting from 24mm up to exclusive 62mm.

DIAMOND

30MM LONG RANGE

4-16x50

NDSI41650LRHF

Designed and optimised for long range advanced shooting where accuracy and consistency is critical. Recent improvements in bullet technologies and calibres combined with advancements in rifle precision and accuracy have resulted in the need for a scope that matches these developments.

FEATURES

- 30mm aircraft-grade aluminium, one-piece main tube
- Glass-etched HOLDFAST reticle
- Fully multi-coated lens
- Microlux ETE GEN III glass coatings
- $\frac{1}{4}$ MOA turret adjustments
- 4" of eye relief
- Side Parallax Adjustable from 10 Yards to ∞
- Nikko Stirlings' RTZ® (Return to Zero) elevation turret for quick shooting
- Supplied with 2 ballistic drop turrets
- Optional side-wheel available
- Sunshade included
- Dual-colour red/green illumination settings

The Diamond LR (Long Range), available in both a 4-16x50 and 6-24x50 variation - is the perfect fit.

Using premium grade lenses featuring the latest in optical coatings combined with a 30mm aircraft grade aluminium tube ensure maximum light transmission and clarity.

Interchangeable ballistic turrets with RTZ® (Return to Zero) can be customised for specific calibers and precise ¼" MOA increments ensure every shot is on target - First time, Every time!

For an explanation of the Hold Fast Reticle and Ballistic Drop Turrets with RTZ®, please see Annexure.

DIAMOND

30MM SPORTSMAN

10-50x60

NSN105060MD

This high precision scope with a 30mm maintube is made in Japan and a preferred choice for professional air rifle competition shooters worldwide. USFT and World FT PCP championships were won in 2007 and 2013 with the Diamond Sportsman rifle scope.

FEATURES

- Developed and Made in Japan
- Target turrets
- 1/8 MOA (3.5mm at 100m) adjustable turrets
- Detachable wheel
- Large side wheel for accurate focussing and range finding
- Optimised coating for clarity and contrast
- Return to zero turrets with covers
- 30mm maintube
- High grade anodized aluminium
- Glass etched reticle
- Nato or Mil Dot reticle

Multi-coated lenses and a new optics calculation enhance the light transmission and offer a crisp image for best shooting results. The saddle focus is state of the art today and the Diamond Sportsman features a detachable 100mm side wheel providing the user with precise focus and parallax correction. The Diamond Sportsman is available with illuminated or non illuminated Mil Dot reticle and non-illuminated NATO reticle.

The target turrets with 1/8 MOA increments feature a return to zero ability. Top competitors worldwide rate this scope over and above most other maker.

DIAMOND FFP

30MM FIRST FOCAL PLANE

4-14X44

NSFFP41444

The Diamond FFP offers first focal plane technology. It is built for fans and users of MIL related reticles for specific shooting needs.

FEATURES

- First focal plane - Image and reticle increase in same proportion
- 1/10 MIL increments (1cm@100m) Military standard
- Excellent Field of view
- Compact length
- Parallax turret includes illumination unit
- Side Parallax adjustment starting from 10yds
- Rugged design
- Glass etched illuminated HMD reticle
- Fully multi-coated lenses
- Well sized target turrets

An advantage of a first focal plane scope is the fact that the image and reticle increase/decrease always in same proportion. This allows fast and easy drop compensations and range finding.

The Diamond FFP features an illuminated glass etched HMD reticle (Half Mil Dot) and a combined parallax and illumination turret on the saddle. Well sized target turrets offer a precise 1/10 MIL click (1cm@100m) which is a worldwide standard.

Rugged built, up to date design and knurlings which fit for handling with gloves offers secure and easy use in the field. The Diamond FFP is made of a solid one piece 30mm high grade aluminium maintube with fully multi-coated lenses and a red index mark on the magnification ring for fast acquisition.

DIAMOND FFP RANGE

4-14X44
NSFFP41444

TARGETMASTER

30MM

5-20x50

NSTT3052050MD

The Targetmaster series includes features desired by tactical and competitive shooters. The main body is a 30mm, hard alloy tube that provides added strength and light gathering capabilities.

FEATURES

- Target turrets with precise 1/8 MOA click
- Lockable zero-retention rings on turrets
- One piece high grade aircraft 30mm alloy main tube
- Glass etched, red/green illuminated Half Mil Dot reticle
- ETE coated lenses for optimised light transmission
- Parallax adjustment on the saddle

All lenses are coated with our successful multi coating that is sharper, clearer and provides more contrast than ever before.

Featuring lockable target style turrets, difficult windage and elevation adjustments in the field are a thing of the past. Across the board these scopes have illuminated glass etched Half Mil Dot reticles and a side saddle focus.

TARGETMASTER

1 INCH

4-16x44

NSTT41644MD

The Targetmaster 1" series has been designed and are built to deliver consistent and repeatable accuracy shot after shot. Available in 5 models these scopes are built upon a one piece solid aircraft grade aluminium 1" tube for optimal strength and durability.

FEATURES

- Field grade target turrets
- ¼ MOA click increments
- Turrets feature lockable zero-retention rings
- Glass etched Half Mil Dot reticle
- Low dispersion proprietary ETE multi-coated lenses
- Dual colour red/green illumination
- Parallax adjustment except on 1.25-5x20 model

All scopes utilise 100% water proof, dust proof and fog proof construction and are purged with Nitrogen gas to prevent internal fogging and corrosion.

Fully multi-coated lenses offer a sharp and clear image. All elevation and windage turrets incorporate a ¼ MOA click adjustment with lockable zero-retention rings.

PANAMAX

1 INCH

4-12x50AOIR

NPGI41250AO

This series is packed with features. The Panamax series have been designed around an extremely wide angle field of view which is approx 20% more than the average comparable 1" scopes on the market today.

FEATURES

- Nikko Stirling Panamax® Wide Angle Lens
- Extreme Field of View – approx 20% more than std 1" scope
- ¼ MOA Increments (7mm@100m)
- Centerfire, rimfire and airgun rated
- Parallax adjustable objective from 10 yards up to infinity
- Dual colour red/green illumination
- 1" Maintube
- Half Mil Dot reticle
- Glass etched reticles
- Fast eye focus
- Design owned by Nikko Stirling

Continuing with our proven hard anodized high grade aluminium main tubes the new design is not only visually appealing but also durable to handle heavy recoil rifles. Available as well with parallax adjustment on bell (AO) and illuminated reticle (IR).

The illuminated models feature a red and green illuminated Half Mil Dot reticle and make it a top performer from Dawn-till-Dusk. This scope is sure to be a hit with hunters and recreational shooters everywhere.

AIRKING

1 INCH

4-12X42

NGRA41242

The Airking range has been designed especially for all types of airguns. Manufactured to withstand the heavy impact that many high power spring airguns give, the Airking range will ensure shot after shot consistency.

FEATURES

- Supplied with 1 inch 3/8 one piece base mount
- 1 inch matte black alloy body tube
- AO models feature parallax adjustment on bell
- HMD reticles
- Multi-coated lenses
- Waterproof, fogproof, shockproof
- Nitrogen filled
- 1/4 MOA adjustments (7mm@100m)
- Fast eyefocus
- Available with dual colour red/green illumination

Across the range all models feature a parallax adjustment on the bell (AO) starting from 10 yds to infinity. All are supplied with a strong 3/8" one piece base mount with recoil stop bolt, and available in standard HMD reticle or illuminated red/green HMD reticle.

NMM3940AO

The MountMaster AO series has been developed for all types of shooting. All models feature an Adjustable Objective (AO) which ranges from 10 yards to infinity. Using superior optical coatings and easy to use features, the MountMaster AO series will suit just about any shooting application you need without breaking the bank.

FEATURES

- Supplied with 3/8" Double Screw Match Mounts
- 1 Inch Matte Black alloy body
- All models Parallax from 10 yards to infinity
- Dual colour red/green illuminated models available
- HMD Half Mil Dot Reticle
- Multi-coated lenses
- Waterproof, fogproof & shockproof
- Nitrogen Filled
- ¼ MOA adjustments (7mm@100m)
- Fast eye focus

All our tried and proven Mountmaster scope series are competitively priced and are rugged enough to stand up to whatever you throw at them. Featuring 1/4" finger adjustable turrets and accurate double screw 3/8" match mounts as well as fully adjustable parallax on the bell (AO) and available with or without illuminated reticle (IR).

All Mountmaster scopes feature fully multi-coated lenses, are shock tested and dry-nitrogen purged at the factory to make them fully water and fog proof for guaranteed performance, whether you are on a hunt or at the range.

REFLEX SIGHTS

PRO T4

NDHOLOT4

The ProT4 is using renowned Japanese optical technology and craftsmanship. It is made of high grade alloy, providing superior strength, combined with robust and advanced optical features.

FEATURES

- Made in Japan
- Parallax free
- Waterproof - shockproof
- Push buttons up/down for illumination setting
- 10 illumination settings
- Automatic shut off after 3 hours
- Lightweight - 40 grams
- Optimised coatings
- Small outer dimensions 51x28x33mm
- Click adjustments with locking feature
- Extreme bright illumination
- 4 MOA red dot
- Pulse electronics for longer battery runtime
- Easy battery change - tray on the side of sight
- Huge elevation range - more than 180" @ 100yds (450cm @ 100m)

The advanced and brand new red dot speed sight the ProT4 is made in Japan. It is parallax free, waterproof and has a click adjustment with locking feature.

The battery is located in a tray on the side which allows easy change without dismounting. It features an advanced illumination system and offers extreme brightness of the 4 MOA dot. At the same time the new pulse electronics extend the run-time of batteries.

New push button technology allows easy adjustment of illumination and an automatic shut off function after 3 hours secures battery lifetime. Optimal coatings and size of the glass lens offers a perfect image. Optional Weaver and other mounts are available. The ProT4 uses a Docter® base which offers a whole range of mounting systems. A great sight for quick shots for hunting or on the shooting range. For rifles and handguns.

REFLEX SIGHTS

NRD SPEED SIGHTS

40IM
NRD40IM

Reflex shooting is a demanding discipline, as the target needs to be acquired quickly in the sights. Accurate sighting without parallax or eye relief limitations are also vital to achieving that top score or hunting success.

FEATURES

- Parallax free and unlimited eye relief
- Versatile for low light and poor contrast environment
- Clear and bright dot
- Compact design and light weight
- Rugged construction
- 12 position dot intensity adjustment
- Precision click adjustments for windage and elevation
- Multi-coated lenses
- Shockproof, waterproof and fog proof
- Scratch-resistant anodizing available in black matte
- Mounts for 3/8" (most air rifles and .22s) and 5/8" weaver style mounting systems
- Centerfire – rimfire – shotgun – hand gun rated

Whether you are a hunter, recreational shooter or competitive marksman, the range of RED DOT reflex sights offers a great choice for you.

All of them offer a 1x magnification. Starting with the NRD25, a low profile 25 mm objective sight through to the 50mm objective lens NRD50. All Nikko Stirling red dot sights are suitable for use on high-powered rifles, shotguns and handguns.

REFLEX SIGHTS

NS SIGHTS

LX3
NSLX3

Reflex shooting is a demanding discipline, as the target needs to be acquired quickly in the sights. Accurate sighting without parallax or eye relief limitations are also vital to achieving that top score or hunting success.

FEATURES

- Parallax free and unlimited eye relief
- 1x magnification on three models
- 4x magnification on LX2
- Versatile for low light and poor contrast environment
- Clear and bright dot
- Compact design and light weight
- Rugged construction
- Dot intensity adjustment
- Precision click adjustments for windage and elevation
- Multi-coated lenses
- Shockproof, waterproof and fog proof
- Scratch-resistant anodizing in black matte
- Integrated weaver style mounting systems
- Centerfire – rimfire – shotgun – hand gun rated

All NS sights are rugged built and offer a scratch resistant black anodized surface together with a 3/8" integrated Weaver mount. A bright dot which is adjustable in several steps for your preferred illumination level and precise click adjustment support your shooting. Parallax free and unlimited eye relief is a feature of the whole range.

As an exception of this range the NSLX2 uses a 4x magnification with sufficient eye relief. Together with the NSLX3 it is built with a 7/8" integrated Weaver mount.

MOUNTS

AIRKING AND STANDARD MOUNTS

*One Piece Air King 3/8" mounts
with Recoil Stop Medium*

NMC38ONE

ALLOY

CNC
PRECISION

Our tried and proved accurate and reliable Airking mounts are made for rimfire, centerfire and air rifles.

FEATURES

- Black matte
- Available for 1" and 30mm tube diameter
- Dovetail 3/8 mounts
- One piece base for additional strength (Airking mounts only)
- Recoil stop (Airking mounts only)

OTHER MODELS INCLUDE:

TWO PIECE 3/8" MOUNTS:NMC38
ONE PIECE AIR KING 3/8" MOUNTS WITH RECOIL STOP:NMC38ONEH
ONE PIECE AIR KING 3/8" MOUNTS WITH RECOIL STOP 30MM:NMC38ONE30, NMC38ONE30H

MOUNTS

MOUNTMASTER AO MATCH MOUNTS

Match 1 inch 3/8"
Dovetail Low
NSMM138L

Our accurate and reliable Mountmaster AO Match Mounts are made of highest grade aluminium with matte black finishing and designed for all categories of rifles.

ALLOY

CNC
PRECISION

FEATURES

- Black matte
- Available for 1" and 30mm tube diameter
- Recoil stop
- Dovetail 3/8" and Weaver mounts
- 3 different heights - low/med/high
- 4 top screws for additional strength
- 3/8" models feature double side screws

OTHER MODELS INCLUDE:

MATCH 1 INCH 3/8 DOVETAIL:	NSMM138L, NSMM138M, NSMM138H
MATCH 1 INCH WEAVER STYLE:	NSMM1WL, NSMM1WM, NSMM1WH
MATCH 30MM 3/8 DOVETAIL:	NSMM3038L, NSMM3038M, NSMM3038H
MATCH 30MM 3/8 WEAVER:	NSMM30WL, NSMM30WM, NSMM30WH

MOUNTS

WRAP RING MOUNTS

Wrap Around Design Weaver 1 inch ringset low

NM20052

Our proofed and tried wrap ring mounts are accurate made of high grade aluminum. Available for 1 inch and 30mm in 3 different heights. Together with our one piece bases a perfect combo to mount your scope.

ALLOY

CNC
PRECISION

FEATURES

- Weaver wrap ring mounts
- Available for 1" and 30mm tube diameter
- 3 different heights - low/med/high
- Black matte finishing

OTHER MODELS INCLUDE:

1 INCH RINGSET: NM20054, NM20054, NM20056
30MM RINGSET: NM20062, NM20064, NM20066

MOUNTS

STEEL LOK QR RINGS

30mm, weaver steel mount, Low
NSMQR30WL

STEEL - LOK™

The STEEL-LOK Quick Release Steel Rings are available for 30mm and 1" scope diameter in three different heights and fit for Weaver/Picatinny. The strong steel construction and field tested design provides precise fitting and re-fitting. Made from solid steel.

FEATURES

- Weaver / Picatinny Design
- Field Tested Design
- Matte Black
- Quick Release
- Machined from Solid Steel
- Precise and Reliable
- Strong Steel Construction
- Fitted with thumb operated quick detachable levers for easy removal and precise re-fitting to original point-of -impact

OTHER MODELS INCLUDE:

30MM, WEAVER STEEL MOUNT:NSMQR30WH, NSMQR30WM, NSMQR30WL
1 INCH, WEAVER STEEL MOUNT:NSMQR1WH, NSMQR1WM, NSMQR1WL

MOUNTS

HOWA AND REMINGTON RAILS

One Piece Picatinny base suit short action
HOWA Stainless finish
NM15501

ALLOY

CNC
PRECISION

Professional made rails and rings for your needs. Designed to delivery accuracy and easy fit.

FEATURES

- One piece Picatinny rails
- Black matte finishing
- Stainless finishing

OTHER MODELS INCLUDE:

ONE PIECE PICATINNY BASE SUIT SHORT ACTION HOWA BLUED FINISH:NM15500
ONE PIECE PICATINNY BASE SUIT LONG ACTION HOWA BLUED FINISH:NM15502
ONE PIECE PICATINNY BASE SUIT LONG ACTION HOWA STAINLESS FINISH:NM15503

MOUNTS

STEEL LOK 2 PIECE BASES

2 Piece Steel Bases NMREM101

STEEL - LOK™

The STEEL-LOK 2 Piece Bases suit the Howa 1500, Remington 900 and Weatherby Vanguard. The 2 Piece Bases provide a Weaver/Picatinny design and suit all action lengths. The high strength Torx screws ensure a strong and precise fit to the action and offers a strong connection between rails and rings. Made from solid steel.

FEATURES

- Two Piece Steel Bases
- Suits Howa 1500, Remington 700 & Weatherby Vanguard
- Suits all action lengths
- Designed to be used
- with STEEL-LOK Quick Detachable Steel Rings Matte Black
- High strength Torx screws
- Precise and Reliable
- Field Tested Design
- Machined from Solid Steel
- Weaver / Picatinny design

LASER RANGE FINDERS

501
NSLRF501

FEATURES

- Magnification 6x
- Accuracy: +/- 1m
- Small size: 109*91*45 mm
- Water and dust resistant
- Up to 800m
- Banner 160m/Tree 440m/House 550m/Guideboard 800m
- 10 second result display
- Automatic shut-off after 10 seconds
- Power supply 2x AAA battery
- Compact and lightweight

603
NSLRF603

FEATURES

- Magnification: 6x
- Accuracy: +/-1 yard
- Small size: 106*73*41 mm
- Range: 5yds – 1312yds
- Banner 300yds/Tree 765 yds/ Guideboard 1312yds
- Water and dust resistant
- Rugged housing with rubber armour
- Measuring Time: Less than 1 second
- Auto Power Off after 10 seconds
- Power: 3V Lithium CR2 battery

ACCESSORIES

Pre zero your scope with the Nikko Stirling scope aligner. The scope aligner saves your time and money.

ALLOY

CNC
PRECISION

FEATURES

- Rugged ABS carry case
- 16 barrel arbores
- Small size
- Suits most rifles

SCOPE ALIGNER
NSALIGNER

The strong beam is a great support for many needs during your hunts or shooting or even used as a torch. Rifle barrel mount and pressure switch included.

MOUNT TO ATTACH NSLFMF7 TO 1" RIFLESCHOES:NSLFR1

MOUNT TO ATTACH NSLFMF7 TO 30MM RIFLESCHOES:NSLFR2

DIAMOND LONG RANGE

USER MANUAL

The Diamond LR scope offers accurate ballistic drop compensation turrets including **RTZ® (Return to Zero)**.

The **RTZ® (Return to Zero)** elevation turret allows you to find your closest zeroed in shooting distance just by this stop.

The elevation and windage is based on ¼ inch at 100yds click increments.

Please note: This equals very accurate to ¼ MOA or 7mm at 100m.

The scope is supplied with 2 Ballistic Drop Turrets:

1. Assembled Ballistic Drop Turret with ¼ inch indications. (equals app. ¼ MOA or app. 7mm@100m)
Full numbers indicate 1" at 100yds
2. Extra blank Ballistic Drop Turret for your customized markings of your required distances. Increments are ¼ inch at 100yds

TO ASSURE PRECISE FUNCTION:

Please take care for proper mounting and follow up. Use a high quality mount, avoid tilted positioning and adjust eye relief accordingly to guarantee best performance. Do not over tighten the mount to avoid damage on scope. For further mounting instructions please check the general Nikko Stirling manual.

HOW TO ZERO IN A BALLISTIC DROP COMPENSATION TURRET WITH RTZ® (RETURN TO ZERO)

Nikko Stirling recommends to use a professional shooting range.

1. To use the **RTZ® (Return to Zero)** unscrew the top of the elevation turret with the supplied red plastic tool or similar to avoid scratches and remove it.

2. Pull off the elevation turret gently
3. Store it on a safe place together with the top part of the elevation turret for reassembling.
4. Zero in your scope to the closest distance of your choice (eg. 100yds) by using the centre of the reticle.

5. Use the slot on top of the spindle to turn the elevation in the required direction (up/down) to zero in your closest required distance (eg. 100 yds).

Use the red plastic tool or a coin.

Increments: ¼ Inch at 100 yds
(app. ¼ MOA; app. 7mm at 100m).

6. Adjust windage accordingly. Pull to unlock and push down to lock setting.

CONTINUED ON NEXT PAGE

IMPORTANT

After zero in the closest distance (eg. 100yds) put the elevation turret gently back again.

Take care to match the zero on the elevation turret with the arrow mark. Close the top of the elevation turret using the red plastic tool to avoid scratches.

Now your **RTZ® (Return to Zero)** is set on the closest distance you zeroed in (eg. 100 yds).

ZERO IN THE BALLISTIC DROP COMPENSATION TURRET WITH THE ¼ INCH MARKS:

1. Zero in the distances that you require by adjusting the elevation turret.
2. As a reference use the arrow mark on the main tube.
3. Write down or remember the different settings for each distance.

ZERO IN THE BLANK BALLISTIC DROP COMPENSATION TURRET WITH CUSTOMIZED MARKS:

1. Zero in the distances you require by adjusting the elevation turret.
2. Mark the turret by yourself accordingly. (eg. 200 yds, 300 yds, 350yds, 400 yds...)
3. As reference use the arrow mark on the main tube.

HOW TO USE THE DIAMOND LR SCOPE IN THE FIELD?

Nikko Stirling recommends to test several distances on a proper shooting range to verify the correct point of impact before hunting.

Use a laser range finder to measure the distance to the target. A precise measurement is important to ensure the proper shooting results.

USING THE BALLISTIC DROP COMPENSATION TURRETS:

Pull elevation turret and adjust to required drop marking.

Now you are dead on.

Use the centre cross of the reticle and fire. If you want to lock the setting push down the elevation turret.

Good sports!

For video instructions please visit www.nikkostirling.com

PLEASE NOTE:

Parameters like barrel length, humidity, altitude, heights of mount, bullet weight, velocity, temperature etc. can lead to different point of impacts.

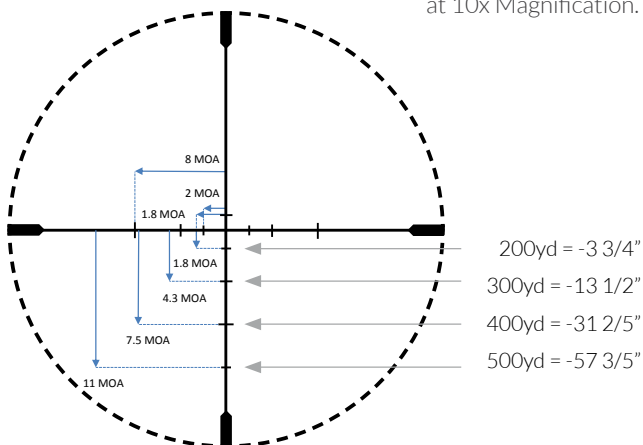

HOLDFAST

USER MANUAL

Accurate HOLDFAST lines with reference subventions in MOA at 100 yards set correct at 10x Magnification.

The Nikko Stirling HOLDFAST reticle has been developed to take longer distance shots quickly by using HOLDFAST lines that match the known point of impact of popular ammunition. A wide variety of ammunition can be accurately used when you adjust the image size in relation to the HOLDFAST reticle by simply adjusting the Magnification Power.

SIMPLE TO USE:

1. Select the ammunition you will use and match the trajectory to the following chart.
2. Then note Magnification.
3. Now sight in (ZERO) your rifle at the specified yardage (usually 100 yards unless indicated otherwise).
4. When hunting select the correct magnification.
5. Use a range finder to correctly range your target.
6. Fire using the holdover line that matches the distance to the target.

EXAMPLE:

When using a Federal .308 with 150 Gr bullet you would select a Magnification setting of 9. Zero at 100 yards. Fire knowing the Centre line is the 100 yard kill point, the second is the 200 yard kill point, the Third line is the 300 yard kill point, the Fourth line is the 400 yard kill point and the Fifth is the 500 yard kill point.

LRX RETICLE

USER MANUAL

The LRX reticle uses everyday measurements to allow you to quickly and accurately, range find and determine the correct hold over for your ammunition. Simply the hold over lines in this reticle are set at exact inches. The first one is set at 1 inch then 2 inches then 4 inches of hold over.

Quick accurate hold over markers - All you

need to know is the trajectory or amount of bullet drop of your ammunition. At 100 yards the distance between the centre and the first horizontal bar is 1 inch. The second bar is 2 inches. Then each bar is a further 2 inches at 100 yards. Hold over at other known distances is now easy to calculate. Full instructions and reference charts are supplied with each rifle scope featuring the LRX reticle.

LRX measurements in inches and yards										
	100	200	300	400	500	600	700	800	900	1000
1st line	1	2	3	4	5	6	7	8	9	10
2nd line	2	4	6	8	10	12	14	16	18	20
3rd line	4	8	12	16	20	24	28	32	36	40
4th line	6	12	18	24	30	36	42	48	54	60
5th line	8	16	24	32	40	48	56	64	72	80
6th line	10	20	30	40	50	60	70	80	90	100

Optics for sport, since 1956.
