2016 PRODUCT GUIDE

MULTI-TOOLS

SOG Multi-tools

Virtually every multi-tool begins with pliers. SOG multi-tools are unmistakable from the competition by its uncontested strength of our plier heads, material selection, the use of innovative-patented technologies, and the drive to make the best tool available.

SOG's patented **Compound Leverage**, which doubles the gripping and cutting force of conventional single-pivot designs as well as allowing for rapid one-hand opening, is a standard feature in many of our tools including the new **PowerPlay** and **Reactor**.

Combining the use of **SOG Assisted Technology (SAT)** in our multi-tools brings another dimension when using them on the field. Both the **PowerAssist** and the new **Reactor** provides one-hand rapid access to the blade like in assisted folding knives.

Designed to resemble the original skull from the MACV-SOG group of which our company is named after, the **MacV Tool** is a versatile everyday carry, keychain tool that will prove handy in many situations with 12 tools.

The **SwitchPlier** is the switchblade of multi-tools. Push the button and the pliers spring into action with the feel and sound of a switchblade knife – ready for anything and legal everywhere.

With all of these features and innovations it is no surprise that SOG multi-tools can be found in the hands and on the belts of carpenters, first responders and even the most elite warriors – ensuring each carrier has the tools they need to get the job done.

PowerAssist

Multi-tool with two assisted opening blades, straight edge and fully serrated, accessible while the tool is closed. Built around SOG's patented Compound Leverage, it generates twice the gripping and cutting force. Components include pliers/gripper, hard wire cutter, crimpers, straight edge blade, fully serrated blade, 3-sided file, large screwdriver, Phillips screwdriver, can opener/small screwdriver, bottle opener/medium screwdriver, v-cutter, rulers, and lanyard ring.

Length: 7"
Weight: 9.6 oz
Steel: 420 Stainless
Handle: Stainless Steel
Pouch: Nylon

Black Oxide \$126.50
B66N-CP - Peg 729857994002

Satin Polish \$119.25
S66N-CP - Peg 729857993999

PowerLock

Heavy-duty multi-tool built around SOG's patented Compound Leverage, providing twice the gripping and cutting force. Components include pliers/gripper, hard wire cutter, crimpers, double toothed wood saw, partially serrated blade, 3-sided file, large screwdriver, Phillips screwdriver, 1/4" drive, awl, can opener/small screwdriver, bottle opener/medium screwdriver, scissors or v-cutter, rulers, and lanyard ring.

Length: 7"
Weight: 9.6 oz
Steel: 420 Stainless
Handle: Stainless Steel
Pouch: Nylon

Satin Polish - With Scissors \$114.00
S60N-CP - Peg 729857993951

ILLUMINATION

SOG Illumination

Work and play don't always happen during the day. Our innovative line of lighting products is always ready anytime and anyplace. Be it self-defense, lighting the trail, or making a work space bright, SOG **Dark Energy** tactical lights and **BladeLight** illuminated knives make the perfect tools for any dark mission.

Dark Energy Tactical Lights:

Ultra-bright and efficient CREE LEDs provide the brightness and longevity required for night patrols, self-defense, or simply working in dark and cramped spaces. Tactical flashlights are indispensable tools that can go anywhere you go.

All **Dark Energy** lights feature:

- Compact and ergonomic design that can go anywhere comfortably in your hand.
- **Tactical "On"** to turn on the light at maximum power to create a blinding self-defense tool.
- Knurled aluminum housing with **MIL-SPEC Type III** anodizing for unbeatable grip and durability.
- **5-way switch:** Momentary on/off, full bright to temporarily blind an attacker, mid power for battery saving bright light, reading mode for close-in work and maximum battery life, and strobe function for tactical and rescue applications.
- **Stand Straight tail cap** allows all Dark Energy lights to stand on the tail cap for hands free operation and to reduce accidental operation while in carry.

The award winning **BladeLight** is the newest innovation in lighting from SOG. The BladeLight combines one of the oldest tools known to man with modern lighting technology into one dual-purpose product.

All **BladeLight** knives feature:

- **CREE LEDs** on both sides of the blade for shadow-less light on whatever you need to cut. Better than a headlamp, which casts shadows behind the blade making precision work difficult.
- Purpose built **SOG Sharp** blades for hunting, fishing, and everyday needs.
- Silent leather sheath on the BladeLight Hunt keeps you undetected.
- **Award-winning** molded sheath for Fillet, Camp, and Tactical models allows the knives to be used as flashlights while sheathed with a built-in carbide V-sharpener that maintains a perfect edge on the go.

Whether it is the ultra-bright lights of the Dark Energy Series or the extremely useful BladeLight Series, as soon as you hold one, you will realize why they are so popular and trusted by law enforcement, military, and first responders.

Dark Energy Series

Our goal was simple; we wanted you to have the brightest flashlights of their size. You will be surprised at the power and durability of these lights as soon as you hold one. All models have been ANSI/NEMA FL1 Standard approved and include super bright advanced CREE LED technology, high capacity batteries, an IPX-7 water resistance rating and a multi-function switch with five operating modes including momentary on/off, 100%, 40%, reading, and strobe.

BLT31K-CP - Peg 729857000192

FOLDING KNIVES

A collection of SOG folding knives and a watch are arranged on a reflective, metallic surface. In the foreground, a closed SOG folding knife with a textured handle and a small circular button is prominently displayed. To its left, the handle of another knife is visible. In the background, a large, cylindrical object, possibly a knife handle or a container, stands upright. To the right, a black wristwatch with a dark face is partially visible. The lighting is dramatic, creating strong highlights and shadows that emphasize the textures and shapes of the objects.

SOG Folding Knives

SOG's folding knives have been proven by many from the officers of law enforcement to soldiers of the US Special Forces and nine-to-five office administrators to weekend warriors. Using high-quality materials, proven and innovative technologies, low-carry pocket clips, and award winning designs ensure that SOG knives meet the demands of the most critical user: you.

Rapid blade access: **SOG Assisted Technology (SAT)** provides the one of the fastest blade opening mechanisms available. As you start to push the blade open, a spring takes over and the blade flicks open without effort. This feature is available on newcomers such as the elegant **Zoom S30V**, powerful **Quake**, and the stout **SideSwipe**.

One-handed operation: Our premium folding knives use the patented Arc-Lock™ mechanism. The Arc-Lock™ allows ambidextrous operation whether opening or closing the blade.

It has been tested to withstand over 1,000 pounds of force, making new models such as the slim **Targa** among the strongest and most durable knives available.

SOG Sharp: A long-lasting, sharp edge is the heart of any knife, which is why SOGs come razor sharp and uses **Cryogenic Heat Treatment** to prolong edge lift. This process slowly decreases the steel's temperature to -300° Fahrenheit, then raises it back to room temperature. This relieves blade stresses on an atomic level resulting in increased toughness and wear-resistance.

SOG's folding knives are great for hunting, camping, and concealed everyday carry. They range in size from the minuscule **Micron** to the large and elegant **Kiku Folder**. Whether you are building a campfire, defending yourself, or simply looking to cut some rope – there is a SOG product for everyone.

Arcitech

High-end Arc-Lock folding knife designed for style and elegance. Crafted with titanium liners and bolsters, mother of pearl thumb stud, and reversible low-carry pocket clip.

Length:	8"	Steel:	san mai VG-10

30th Anniversary Collection

In 1986, our journey began with a reproduction of a unique combat knife used in the jungles of Vietnam for covert missions by members of a highly classified US special ops unit known as MACV-SOG. Today, 30 years later, that first commemorative model grew into a full line of innovative knives and tools.

To mark our 30th anniversary, we took two iconic models from our product line - the Tech Bowie fixed blade and the

Trident folding knife - and created special edition models only for this year. Each one is meticulously crafted with a serial number and an acid etched, textured blade face with a tigerstripe camouflage pattern to recall the origins and inspirations of the SOG brand. Every anniversary blade comes in a walnut display case with a limited edition collectable patch, challenge coin, and certificate.

Tech Bowie

Modern version of the classic Bowie style blade with rubber grip and stainless steel cross guard and pommel. Includes molded Kydex sheath.

Length: 11"
Blade: 6.4"
Weight: 11.2 oz
Steel: AUS-8

Handle: Rubber with
Stainless Cross
Guard/Pommel
Sheath: Leather

FIXED BLADES

SOG Fixed Blades

In 1986, SOG began its journey with the SOG Bowie by replicating a unique combat knife and paying tribute to the Special Ops unit in Vietnam that created it. Twenty-nine years later, SOG is the world's leader in specialized fixed blades, offering superior sharpness, styling, feel, and balance with every knife.

Premium Materials: Our fixed blades are crafted using some of the best materials available such as S30V stainless steel in the **Huntspoint**, USA made leather and Kydex sheaths for the **Tech Bowie**, and linen Micarta handles on the **Kiku Series**.

SOG Sharp: Just like our folding knives, many of our fixed blades come and stay razor sharp by using **Cryogenic Heat Treatment** for increased toughness and heightened wear-resistance. Additionally, edges stay sharper longer and demonstrate a significant decrease in micro-fracturing and edge-chipping.

Every SOG fixed blade is developed with its end-user in mind – from the needs of elite forces to the simple tasks of everyday life, SOG has you covered.

Forge

Traditionally styled, large clip point fixed blade knife with stamping pattern on the blade. Includes leather sheath.

GEAR

SOG GEAR

SOG operates with the expectation that any tool we create will be abused and used often. Made for the outdoors and more, SOG gear is for people who need great tools for everyday use. From tomahawks to throwing knives to axes, there is a piece for you.

Preparedness: Our **Survival Hawk** was created to be useful in any situation, and features full tang stainless steel construction, 550 paracord wrapped handle, wire breaker/prier, and built in ferrocerium firestarter rod. Take comfort in knowing that you are prepared for anything.

Updated: The newly updated **Folding Saw** has a new design that allows the blade to be switched between a wood and bone saw

blade. The lightweight and balanced design allow it to be easily carried anywhere with the supplied carrying pouch. Outdoorsman should not go anywhere without one of these.

Forged: Our **Base Camp** and **Backcountry Axe** feature a fully forged cutting head for the ultimate in durability and strength. Combined with the ergonomic shape of the Base Camp handle or the saw hidden in the handle of the Backcountry, they make great go-to tools for the outdoors.

From Survival Hawks to Throwing Knives, there is a SOG product for you. And like all SOG products, SOG gear comes with a lifetime warranty, allowing you to go about life without worry.

PACKS

SOG PACKS

Breaking the mold on conventional tactical packs, SOG introduces a line of packs that serve the traditional tactical user with added components designed for outdoor adventures. These packs take inspiration from the company's historic roots in creating field-proven knives and then mixes in features fit for the modern user.

Not only do these packs offer typical functions like hydration sleeves, MOLLE attachment points, and durable fabrics, but also premium features such as Hypalon MOLLE fields, Quad-Zip full access compartments, integrated long item carriers, and lightweight suspension systems. Contemporary use of tactical packs calls for the need of added comfort, versatility, and durability. SOG packs deliver on all these benefits and more.

For longer expeditions, the versatile **Seraphim** 35L or the adaptable **Prophet** 33L can house all your gear without sacrificing mobility and comfort. For outings shorter than that, the **Scout** 24L can handle anything for an overnight or day

trip while the **Ranger** 12L makes a great companion for quick escapes. Modern urban warriors will find that the **TOC** 20L or **EVAC** 18L sling can easily organize their daily carry. Whether heading out for a multi-day excursion or a quick morning errand, there is a SOG pack for your needs.

SOG packs incorporate a combination of these features:

- Hypalon MOLLE fields make attaching extra external storage or items faster, easier, and stronger while remaining stealthy.
- Impact-resistant shell on the top pocket with internal organization to stow valuables such as glasses, camera, binoculars, and phone.
- Quad-zip full access main compartment allows for quick access to any part of the interior, such as being able to quickly get at items at the bottom of the pack due to the panel-loading design
- Integrated, external long item carry for easy access to oversize objects like rifles, bows, fishing rods, or axes.
- Internal suspension system to take the weight off the shoulders for a balanced carry.

Seraphim

Voluminous 35L pack with Hypalon MOLLE field, integrated long item carry, Quad-zip panel-loading main compartment, impact-resistant shell on the top pocket, fold-down panel, and hydration compatible sleeve.
